

Ref: Joyville/ 20-21/ 010

Date: 13/12/2021

To, The Joint Director/ Scientist 'D' Northern Regional Office Ministry OF Environment, Forest & Climate Change (MoEF&CC) Bays No. 24-25, Sector 31-A, Dakshin Marg Chandigarh

Sub: Submission of Six-monthly Compliance Report of Stipulated Conditions of Environmental Clearance for the group housing colony "Joyville" on plot area measuring 17.9 Acres in Sector-102, District- Gurugram, Haryana for the period April 2021 to September 2021.

Sir,

In accordance to the condition of Environmental Clearance received from State Environmental Impact Authority for the above project vide letter no. SEIAA/HR/2018/1077 dated 20/08/2018; we are submitting herewith six monthly Compliance report of stipulated condition of Environmental Clearance (in soft copy "as notification in Gazette of India on 28th November 2018") for the period of April 2021 to September 2021.

Thanking you!

Yours Sincerely,

For M/s Joyville Shapoorji Housing Pvt. Ltd.

Authorized Signatory

Copy to:

- 1. Chairman, Haryana State Pollution Control Board (HSPCB), C-11, Sector-6, Panchkula, Haryana.
- 2. The Member Secretary, State Environment Impact Assessment Authority (SEIAA), Haryana, Bay no. 55-58, Prayavan Bhawan, Sector-2, Panchkula, Haryana

CHAPTER-1

INTRODUCTION AND PROJECT DESCRIPTION

1.1 INTRODUCTION

Proposed Construction of Group Housing colony "Joyville" on plot area measuring 17.9 acres In Sector- 102, Gurgaon, Haryana is being developed by M/s Joyville Shapoorji Housing pvt. Ltd. Building plans of the project have been approved by Town and Country Department Haryana.

This project has been granted environmental clearance vide letter no. **SEIAA/HR/2018/1077 at dated 20th August, 2018** by the State Environment Impact Assessment Authority, Haryana is enclosed as **Annexure-1**.

1.2 PROJECT DESCRIPTION

| SI. No. | Description | Details | Unit |
|---------|-----------------------------|-----------|------|
| 1 | Plot Area | 72438.615 | SQM |
| 2 | Proposed Built Up Area | 295785 | SQM |
| 3 | Total Water Requirement | 980 | KLD |
| 4 | Fresh Water Demand | 669 | KLD |
| 5 | Total Waste Water Generated | 772 | KLD |
| 6 | Capacity of STP | 930 | KLD |
| 7 | Total Power Requirement | 5667 | KW |
| 8 | No. of RWH Pits | 01 | Nos. |
| 9 | Solid Waste Generation | 5.4 | TPD |
| 10 | Total Parking | 1890 | ECS |

Table 1.1: Brief Description of project

1.3 PRESENT STATUS

Project is in construction phase.

1.4 PURPOSE OF THE REPORT

This six-monthly report is being submitted as per the condition stipulated in the Environmental Clearance letter.

Further, the study will envisage the environmental impacts that have generated in the local environment due to the project.

The environmental assessment is being carried out to verify:-

- That the project does not have any adverse environmental impacts in the project area and its surrounding
- Compliance with the conditions stipulated in the Environmental Clearance Letter.

- The Project Management is implementing the environmental mitigation measures as suggested in the approved Form-1, Form-1A, Environmental Management Plan (EMP) and building plans.
- The project proponent is implementing the environmental safeguards in true spirit.
- Any non-conformity in the project with respect to the environmental implication of the project.

CHAPTER-2

COMPLIANCE OF STIPULATED CONDITIONS OF ENVIRONMENTAL CLEARANCE

| Name of Project | Proposed Group Housing colony "Joyville" on plot area measuring 17.9 acres in Sector- 102, Gurgaon, Haryana | | | | | |
|-----------------------------|---|--|--|--|--|--|
| Clearance No. | SEIAA/HR/2018/1077 dated 20 th August, 2018 | | | | | |
| Period of compliance Report | April 2021 to September 2021 | | | | | |

PART A - CONSTRUCTION PHASE (SPECIFIC CONDITIONS)

| S. No. | Conditions of Environmental Clearance | Status of Compliance |
|--------|--|--|
| 1. | | Consent to Establish (CTE) has been obtained from |
| | | Haryana State Pollution Control Board. Copy of |
| | under Air and Water Act and a copy shall be | |
| | submitted to the SEIAA, Haryana before start of any construction work at site. | |
| 2. | | First aid room had already been provided at the |
| 2. | | project site for the laborers and the facility will be |
| | construction and operation phase of project | continued during operational phase also. |
| | · · · · · · · · · · · · · · · · · · · | Photograph of the same is attached as annexure 3 . |
| 3. | Adequate drinking water and sanitary facilities | Adequate drinking water & sanitary facilities had |
| | should be provided for construction workers at | already been provided for construction workers at |
| | | the site. The workers at construction site engaged |
| | | from the nearby areas therefore the waste water |
| | | and solid waste generation is negligible in quantity. |
| | construction phase should be ensured. | Solid waste generated during the construction phase is being disposed off safely. Photograph of |
| | construction phase should be ensured. | the same is attached as annexure 4. |
| 4. | All the top soil excavated during Construction | Top soil excavated from construction site has been |
| | | separated and will be used in horticulture/ |
| | | landscape development. Photograph is attached as |
| | project site. | annexure 5. |
| 5. | | Separate storage area has been provided at project |
| | Building material required during construction | _ |
| | | photographs are attached as annexure 6. The |
| | | construction waste is handed over to authorized |
| | | vender for disposal at approved landfill site and the certificate from authorized vender regarding this is |
| | the necessary precaution for general safety and | |
| | health with the approval of competent | |
| | authority. | |
| 6. | Construction spoils including bituminous | Construction spoils is being stored in a dedicated |
| | | area duly bounded to avoid contamination to the |
| | | environment in proximity. Storage area is covered |
| | | by insulated lining to prevent contamination from |
| | - | hazardous materials like fuel of DG sets. Waste oil of the generations is being disposed of through |
| | | authorized vendors and the copy of agreement for |
| | | disposal of hazardous waste is attached as |
| L | | |

| Half-yearly | Compliance | Proposed | Group | Housing | colony | "Joyville" | on | plot | area | Page 7 of 24 |

| Report of EC Conditions | | measuring | 17.9 acr | es In Secto | or- 102, G | urgaon, Har | yana | l | | |
| | | | | | | | | | | |

| | with necessary approval of Haryana State pollution control Board. | |
|-----|---|--|
| 7. | construction phase should be of low sulphur | The diesel generator sets to be used during construction phase are of low sulphur diesel type and conform to Environment (Protection) Rules prescribed for air and noise emission standard. |
| 8. | be stored in underground tank if required | The diesel required for operating DG sets has been stored as per the requirements only which is low in quantity. Therefore, underground tank is not required at site to store diesel. |
| 9. | standards both during day and night. Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase. Adequate measures | |
| 10. | the construction as per the provision of fly ash | Fly ash is being used in construction activities and the purchase order for the same is attached as annexure 10. |
| 11. | | Construction of water recharge pits for recharge of ground water, as per Central Ground Water Board and BIS standards is proposed. |
| 12. | с , | Premix concrete and curing agent and other best practices are being used to save water. RMC batch report is attached as annexure 11. |
| 13. | augmentation in the region and sustainability of water resources, the developer will submit the NOC from CGWA specifying water extraction | |
| 14. | Roof should meet prescribed requirements as per energy conservation building code by using appropriate thermal insulation materials. | The same will be complied at the appropriate stage of site development. |
| 15. | | conservation building code. |

| Half-yearly | Compliance | Proposed | Group | Housing | colony | "Joyville" | on | plot | area | Page 8 of 24 |
|--------------|------------|-----------|----------|-------------|------------|-------------|------|------|------|--------------|

| | | | | | | | | | | |

| | use of appropriate thermal insulation to fulfill the requirements. | |
|-----|--|---|
| 16. | obtained for structural safety of the building on account of earthquake, adequacy of firefighting equipment etc as per national building code including protection measures for lighting etc. | No forest land is involved in this proposed project; NOC from forest department is attached as annexure 14. |
| 17. | severe shortage of water supply in the region requires the developer to redraw the water and | |
| 18. | The project proponent as stated in the proposal | |
| 19. | The project proponent shall provide for adequate fire safety measures and equipments as required by Haryana Fire Service Act, 2009 | |
| 20. | power supply before the start of construction. In no case project will be operational solely on | connection of DHBVN power supply. The project will not be operational solely on generators sets without any power supply from any external power utility. Assurance letter obtained from DHBVN for |
| 21. | power load of the project shall be submitted to | Detail calculation of power load & ultimate power load of the project had already been submitted and provision for electrical infrastructure has also been made. |

| Half-yearly | Compliance | Proposed | Group | Housing | colony | "Joyville" | on | plot | area | Page 9 of 24 |
|--------------|------------|-----------|----------|-------------|------------|-------------|------|------|------|--------------|

| | | | | | | | | | | |

| | be made for electrical infrastructure in the | |
|-----|--|---|
| | project area. | |
| 22. | The project proponent shall not raise any construction in the natural land depression/ | No construction will take place in natural land depression/ Nallah/Water course. It is ensured that the natural flow from the Nallah/Water course will not be obstructed due to project activity. |
| 23. | The project proponent shall keep the plinth | |
| 24. | of population does not exceed norms approval | The same has been carried out and it will be ensured that density of population does not exceed norms approval by Director General Town and Country Department Haryana during construction phase. |
| 25. | with the declaration that ground water will not | Ground water will not be used for construction and affidavit for the same is attached as annexure 19 . CSTP treated water, provided by HUDA, is being used for construction purpose as assurance letter for the same has been obtained and attached as annexure 12 . |
| 26. | | The same has been taken care of and no existing tree was cut down. Project landscaping plan will be modified to include that tress in green area. |
| 27. | barricade around the project area, dust screen for every floor above the ground, proper sprinkling and covering of stored material to | 03 mtrs high barricade has been provided around the project area. Dust screen for every floor above the ground has been provided. Water sprinkling and covering of stored material is being done at site. Anti smog gun has also been provided at site to restrict dust and air pollution during construction phase of the project. Photograph of the same is attached as annexure 20 . |
| 28. | sedimentation basin in the lower level for the | Construction of sedimentation basin in the lower level for the project site to trap pollutant and other wastes during rains has been provided at project site. Photograph of the same is attached as annexure 21. |
| 29. | | Before start of construction, proper rasta of proper width & strength has been provided at project site. Logistic Layout plan is attached as annexure 22. |
| 30. | The Project proponent shall ensure that the U- value of the glass is less than 3.177 and maximum solar heat gain co- efficient is 0.25 for vertical fenestration. | |
| 31. | The Project proponent shall adequately control | Measures are being taken care to control |

| S. No | Conditions of Environmental Clearance | Status of Compliance |
|-------|---|---|
| | | Low sulphur diesel shall be used to run the DG sets. All the DG sets will be of "enclosed type" to prevent |
| ä | areas illumination and for domestic use | noise and should conform to rules made under |
| | <i>7</i> . | Environment (Protection) Act 1986, prescribed for |
| | 1986. The location of DG sets should be in the | air and noise emission standards. Stack height will be kept as per CPCB norms. |
| | basement as promised by the project | |
| | proponent with appropriate stack height i.e. | |
| | above the roof level as per the CPCB norms. The diesel used for DG sets should be ultra | |
| | low sulphur diesel (35 ppm sulphur), instead | |
| | of low sulphur diesel. | |
| f. / | Ambient Noise level should be controlled to | Ambient noise levels has been monitored by |
| | ensure that it does not exceed the prescribed | |
| | standards both within and at the boundary of proposed group housing project. | construction phase indicating all results within permissible limits of EPA, 1986. The latest |
| | proposed group nousing project. | monitoring has been done and attached as |
| | | Annexure-4. This practice will be continued during |
| | | operational phase also. |
| - | | Agreed. More than 20.10% green cover area for tree |
| - | | plantation will be started at fast pace only after completion of civil construction work in the building. |
| 1 13 | | The open spaces inside the plot will be covered with |
| t | the road sides preferably with local species | herbs and shrubs. |
| | which can provide protection against noise | |
| | and suspended particulate matter. The open spaces inside the project shall be preferably | |
| | landscaped and covered with vegetation/ | |
| | grass, Herbs & shrubs. Only locally available | |
| - | plant species shall be used. | |
| | The Project proponent shall strive to minimize | - |
| | water in irrigation of landscape by minimizing grass area, using native verity, xeriscaping and | |
| | mulching, utilizing efficient system, | |
| | scheduling irrigation only after checking | |
| | evapo- transpiration data. | |
| | | Rain water harvesting and ground water recharging will be practiced. Ground water levels and Its quality |
| | • • | will be monitored regularly in consultation with the |
| 1 | runoff, pretreatment through sedimentation | Central Ground Water Authority. Oil & Grease trap |
| | | will be provided to remove oil and grease from the |
| | · · · · · · · · · · · · · · · · · · · | surface run-off and suspended matter will be removed in a settling tank before its utilization for |
| | mts. Above the highest ground water table. | |
| | Care shall be taken that contaminated water | - |
| | do not entry any RWH pit. The project | |
| | proponent shall avoid RWH of first 10 min of | |
| | rainfall. Roof top of the building shall be without any toxic material or paint, which can | |
| | contaminate rain water. Wire mess and filters | |

| S. No | Conditions of Environmental Clearance | Status of Compliance |
|-------|---|---|
| 2. | monthly reports on the status of compliance of the stipulated EC conditions including results of | Six monthly compliance reports are being regularly filed to the concerned authorities. Same will be done in the future also. Receiving's of previous compliance report submitted is attached as Annexure 28. |
| 3. | STP outlet after stabilization and stack emission shall be monitored monthly. Other environmental parameters and green belt shall be monitored on quarterly basis. After every 03 months the project proponent shall conduct environmental audit and shall take corrective measure, if required, without delay. | |
| 4. | The SEIAA, Haryana reserves the right to add additional safeguard measures subsequently, if found necessary. Environmental Clearance granted will be revoked if it is found that false information has been given for getting approval of this project. SEIAA reserves the right to revoke the clearance if conditions stipulated are not implemented to the satisfaction of SEIAA/MoEF. | |
| 5. | The project proponent shall not violate any judicial orders/ pronouncements issued by any court/tribunal. | - |
| 6. | storage of diesel from Chief Controller of Explosives, Fire Department, Civil Aviation Department, Forest Conservation Act,1980, and Wildlife (Protection) Act, 1972 etc. shall be obtained, as applicable by project proponent | NOC from fire department has been obtained and attached as annexure 17. |
| 7. | The project proponent should inform the public that the project has been in accorded Environmental clearance by SEIAA and copies of the clearance letter are available with the State Pollution Control Board & SEIAA. This should be advertised within 7 days from date of issue of clearance letter at least in two local newspapers that are widely circulated in the region and copy of the same should be forwarded to SEIAA Haryana. A copy of Environmental Clearance conditions shall also be put on project proponent's website for public awareness. | |
| 8. | Under the provision of Environment (Protection) Act, 1986, legal action shall be initiated against the project proponents if it was found that construction of the projects has been started | environment clearance. |

Chapter 3

DETAILS OF ENVIRONMENTAL MONITORING

3.1 AMBIENT AIR QUALITY MONITORING

3.1.1 Ambient Air Quality Monitoring Stations

Ambient air quality monitoring has been carried out at one location, being near main gate to assess the ambient air quality of Project Site. This will enable to have an analytical understanding about air quality and the changes in the air environment in the study area with respect to the condition prevailing. The location of the ambient air quality monitoring station is given in **Table 3.1**.

Table 3.1 Details of Ambient Air Quality Monitoring Stations

| S. No. | Location Code | Location Name/ Description | Environmental Setting |
|--------|------------------|----------------------------|-----------------------|
| 1. | AAQ-1 | Near main Gate | Residential |

3.1.2 Ambient Air Quality Monitoring Methodology

Monitoring was conducted in respect of the following parameters:

- Particulate Matter 2.5 (PM_{2.5})
- Particulate Matter 10 (PM₁₀)
- Sulphur Dioxide (SO₂)
- Oxide of Nitrogen (NO₂)
- Carbon Monoxide (CO)
- Ozone (as O₃)
- Lead (Pb)
- Ammonia (NH₃)
- Benzene (C₆H₆)
- Benzo (a) Pyrene
- Arsenic (As)
- Nickel (Ni)

The duration of sampling of PM_{2.5}, PM₁₀, SO₂, NO₂, PB, NH₃, C₆H₆, AS and Benzo(a)Pyrene was 24 hourly continuous sampling per day. The Sampling of CO was done 1 hour while Ozone was sampled for 8 hours duration as per National Ambient Air Quality Standards.

The air samples were analyzed as per standard methods specified by Central Pollution Control Board (CPCB) and IS: 5182. The techniques used for ambient air quality monitoring and minimum detectable levels are given in **Table 3.2**.

Fine Particulate Sampler APM 550 instruments have been used for monitoring Particulate Matter 2.5 (PM2.5 i.e. <2.5 microns), and Respirable Dust Sampler APM 450 was used for sampling Respirable fraction (<10 microns), gaseous pollutants like SO2, and NO₂. Bladder and Aspirator bags were used for collection Carbon monoxide samples. Non-Dispersive Infrared Absorption Method (NDIR) techniques have been used for the estimation of CO. Gas Chromatography techniques have been used for the estimation of Benzo (a)Pyrene and Benzene.

| S. No. | Parameter | Technique | Technical Protocol |
|-----------|------------------------------------|--|----------------------|
| 1 | Particulate Matter 2.5 | Gravimetric Method | IRDH/SOP/AAQM/01 |
| 2 | Particulate Matter 10 | Gravimetric Method | IS 5182 P- 23 (2006) |
| 3 | Sulphur dioxide (So ₂) | Modified West and Gaeke | IS 5182 P-02 (2001) |
| 4 | Oxides of Nitrogen | Jacob & Hochheiser Method | IS 5182 P-06 (2006) |
| 5 | Carbon Monoxide | Non-Dispersive Infrared Absorption Method (NDIR) | IRDH/SOP/AAQM/08 |
| 6 | Ozone (as O ₃) | Chemical Method (Colorimetric) | IS:5182(Part-9) |
| 7 | Lead (Pb) | Atomic Absorption Direct Aspiration Method | IS:5182(Part-22) |
| 8 | Ammonia (NH ₃) | Indophenol Method (Colorimetric) | SOP:IRDH/SOP/AAQM/09 |
| 9 | Benzene (C_6H_6) | Gas Chromatography | IS:5182(Part-11) |
| 10 | Benzo alpha Pyrene | Gas Chromatography | IS:5182(Part-12) |
| 11 | Arsenic (As) | Atomic Absorption through Hydride Generator | SOP:IRDH/SOP/AAQM/06 |
| 12 | Nickel (Ni) | Atomic Absorption direct Aspiration method | SOP:IRDH/SOP/AAQM/07 |

3.1.3 Ambient Air Quality Monitoring Results

The detailed on-site monitoring results of PM $_{2.5}$, PM $_{10}$, SO $_2$, NO $_2$, CO, O $_3$, Pb, NH $_3$, C $_6$ H $_6$, AS, Ni, and Benzo (a)Pyrene are presented in **Table 3.3**.

| S. No | Parameter | Method | Results | Unit | Requirement (CPCB limits)* |
|----------|--|------------------------|---------|-------------------|----------------------------------|
| 1. | Particulate Matter as PM _{2.5} | IRDH/SOP/AAQM/01 | 70.0 | $\mu g/m^3$ | 60 |
| 2. | Particulate Matter as PM ₁₀ | IS 5182 P- 23 (2006) | 153.0 | $\mu g/m^3$ | 100 |
| 3. | Sulphur dioxide as SO ₂ | IS 5182 P-02 (2001) | 09.6 | $\mu g/m^3$ | 80 |
| 4. | Nitrogen dioxide as NO ₂ | IS 5182 P-06 (2006) | 24.2 | $\mu g/m^3$ | 80 |
| 5. | Carbon monoxide as CO | IRDH/SOP/AAQM/08 | <1.0 | mg/m³ | 4.0 |
| 6. | Ozone (as O ₃) | IS:5182(Part-9) | 11.7 | µg/m ³ | 100 (8 Hourly) |
| 7. | Lead (Pb) | IS:5182(Part-22) | < 0.1 | µg/m ³ | 1 |
| 8. | Ammonia (NH ₃) | SOP: IRDH/SOP/ AAQM/09 | 14.1 | µg/m ³ | 400 |
| 9. | Benzene (C ₆ H ₆) | IS:5182(Part-11) | <1.0 | µg/m ³ | 5 |
| 10. | Benzo alpha Pyrene | IS:5182(Part-12) | <1.0 | ng/m ³ | 1 |
| 11. | Arsenic (As) | SOP: IRDH/SOP/ AAQM/06 | <1.0 | ng/m ³ | 6 |
| 12. | Nickel (Ni) | SOP: IRDH/SOP/ AAQM/07 | <1.0 | ng/m ³ | 20 |

| Table 3.3: Ambient Air | [.] Quality | Monitoring | Results |
|------------------------|----------------------|------------|---------|
|------------------------|----------------------|------------|---------|

3.1.4 Discussion on Ambient Air Quality in the Study Area

The levels of PM_{10} and $PM_{2.5}$ near main gate of project site is above than permissible limit of 100 μ g/m³ 60 μ g/m³ respectively (for residential, rural and other areas as stipulated in the National Ambient Air Quality Standards). Other parameters were observed within the corresponding stipulated limits at monitoring location.

3.2 AMBIENT NOISE MONITORING

3.2.1 Ambient Noise Monitoring Locations

The main objective of noise monitoring in the study area is to assess the present ambient noise levels at the project site. A preliminary reconnaissance survey has been undertaken to identify the major noise generating sources in the area. Ambient noise monitoring was conducted at 1 location at the front side of the project, site as given in **Table 3.4**.

Table 3.4: Details of Ambient Noise Monitoring Stations

| S. No. | Location Code | Location Name/ Description | Present Landuse |
|--------|------------------|----------------------------|-----------------|
| 1. | N1 | Near Main Gate | Residential |

3.2.2 Methodology of Noise Monitoring

Noise levels were measured using integrated sound level meter manufactured by Envirotech Instrument Pvt. Ltd. The integrating sound level meter is an integrating/ logging type with frequency range of 'A' type as per IS 15675 (Part 1) 2005. This instrument is capable of measuring the Sound Pressure Level (SPL), Leq and SEL on digital display.

Noise level monitoring was carried out continuously for 24-hours with one hour interval starting at 12:40 hrs to 11:40 hrs next day. The noise levels were monitored on working days only. During each hour Leq were directly computed by the instrument based on the sound pressure levels. Lday (Ld), Lnight (Ln) and Ldn values were computed using corresponding hourly Leq

3.2.3 Ambient Noise Monitoring Results

The locations wise ambient noise monitoring result are summarized in **Table 3.5**. The locationwise variation of noise levels are graphically presented in **Figure 3.1**.

| | | Day Tin | ne - dB(A) | Night | Гime - dB(A) |
|------------|----------------|---------|------------------------------------|---------|------------------------------------|
| Sr. No. | Test Locations | Results | Limits as per CPCB guideline | Results | Limits as per CPCB guideline |
| 1 | Near Main Gate | 53.2 | 55 | 42.1 | 45 |

Figure 3.1 Location-wise Variation of Ambient Noise Levels

3.2.4. Discussion on Ambient Noise Levels in the Study Area

<u>Day Time Noise Levels (L_{day}):</u>

The day time noise level was found within the limit for Residential area i.e. 55 db(A).

<u>Night Time Noise Levels (L_{night}):</u> The night time noise level was found within the limit for Residential area i.e. 45 db(A)

3.3 GROUNDWATER QUALITY MONITORING

3.3.1 Groundwater Quality Monitoring Locations

Facility at project site is using water through tanker which would be available for consumption after the RO treatment. Since the project site is not having any bore well for the extraction of ground water, ground water monitoring is not carried out.

3.4 SOIL MONITORING

3.4.1 Soil Monitoring Locations

The objective of the soil monitoring is to identify the impacts of ongoing project activities on soil quality and also predict impacts, which have arisen due to execution of various constructions allied activities. Accordingly, a study of assessment of the soil quality has been carried out.

To assess impacts of ongoing project activities on the soil in the area, the physico-chemical characteristics of soils were examined by obtaining soil samples from selected points and analysis of the same. One sample of soil was collected from the project site for studying soil characteristics, the location of which is listed in **Table 3.6**.

Table 3.6 Details of Soil Quality Monitoring Location

| S. No. | Location Code | Location Name/ Description |
|--------|---------------|----------------------------|
| 1. | S1 | Site Office |

3.4.2 Methodology of Soil Monitoring

The sampling has been done in line with IS: 2720 & Methods of Soil Analysis, Part-1, 2nd edition, 1986 of American Society for Agronomy and Soil Science Society of America. The homogenized samples were analyzed for physical and chemical characteristics (physical, chemical and heavy metal concentrations). The soil samples were collected in the month of September, 2021.

The samples have been analyzed as per the established scientific methods for physico-chemical parameters. The heavy metals have been analyzed by using Atomic Absorption Spectro-photometer and Inductive Coupled Plasma Analyzer.

3.4.3 Soil Monitoring Results

The physico-chemical characteristics of the soil, as obtained from the analysis of the soil sample, are presented in **Table 3.7.**

Table 3.7: Physico-Chemical Characteristics of Soil in the Study Area

2.4.4 Discussion on Soil Characteristics in the Study Area

The soil in study area is characterized by moderate organic content. The soil quality in the project area has not been affected by the project activities.

STATE ENVIRONMENT IMPACT ASSESSMENT AUTHORITY HARYANA Bay No. 55-58, Prayatan Bhawan, Sector-2, PANCHKULA.

No. SEIAA/HR/2018/ (p 7 7

5 L

Dated: 23 818

Colaba, Mumbai-400004 (Formerly M/s Eventual Builders Pvt. Ltd.) M/s Joyville Shapoorji Housing Pvt. Ltd., Redgd. Office SP Centre, 41/44, Minoo Desai Marg,

Clearance Environment Subject:

Environment Clearance for Proposed Group Housing Colony "Joyville" on Plot area measuring 17.9 Acres in Sector-102, Gurugram Manesar Urban Complex, Gurgaon, Haryana.

Dear Sir,

Notification, 2006. The proposal has been appraised as per prescribed procedure in the This letter is in reference to your application no. nil dated 13.04.2018 addressed to M.S. SEIAA, Haryana received on 23.04.2018 and subsequent letter dated response to the observations of the State Expert Appraisal Committee (SEAC) constituted 02.07.2018 seeking prior Environmental Clearance for the above project under the EIA of provisions under the EIA Notification, 2006 on the basis of the mandatory documents enclosed with the application viz., Form-1, Form1-A, Conceptual Plan, EIA/EMP on the basis of approved TOR and additional clarifications furnished in & CC, GOI vide their Notification 21.08.2015, in its meetings held on 10.05.2018 and 27.07.2018 awarded "Gold" grading to the project. by MOEF light

KLD. The fresh water requirement shall be 669 KLD. The waste water generation shall It is inter-alia, noted that the project involves the construction of Group Housing Colony on plot area Measuring 17.9 Acres in Sector-102, Gunigram Manesar Acres) Total built up area shall be 295785 sqm. The project shall comprise of 17 (14+3) no. of building blocks (13 residential + A I EWS +1 PS + 1 Club + 1 Commercial + Basement + Stilt/GF + maximum 27 Blocks). The number of dwelling units is 1798. The The Urban Complex, District Gurgaon, Haryana on total plot area is 72438.615 sqm. (17.9 maximum height of the building is 90 meters. The total water requirement shall be 980 be 772 KLD which will be treated upto tertiary level in STP having total capacity of 930 DHBVN. The Project Proponent has proposed to develop green belt on 21,110.00 sqm (31.49 %) of project area (periphery plantation 3353.62 sqm + Lawn Area 17757.35sqm). solid waste generation shall be 5.4 TPD. The bio-degradable waste will be treated in the project area by adopting appropriate technology. The total parking spaces proposed are supplied by The Project Proponent proposed to construct 01 rain water collection/storage tank. KLD. The total power requirement shall be 5667 KW which will be 1890 ECS 2

Eres States -

The State Expert Appraisal Committee, Haryana after due consideration of the relevant documents submitted by the project proponent and additional clarification clearance for the project mentioned above, subject to compliance with the stipulated conditions. Accordingly, the State Environment Impact Assessment Authority in its meeting held on 16.08.2018 decided to agree with the recommendations of SEAC to furnished in response to its observations, have recommended the grant of environmental accord necessary environmental clearance for the project under Category 8(b) of EIA Notification 2006 subject to the strict compliance with the specific and general conditions mentioned below:- \mathbf{C}

<u>PART A-</u> <u>SPECIFIC CONDITIONS:-</u> <u>Construction Phase:-</u>

- "Consent for Establish" shall be obtained from Haryana State Pollution Control Board under Air and Water Act and a copy shall be submitted to the SEIAA, Haryana before the start of any construction work at site. 1
- A first aid room as proposed in the project report shall be provided both during construction and operational phase of the project. 2
 - Adequate drinking water and sanitary facilities shall be provided for construction by the laboures is strictly prohibited. The safe disposal of solid wastes/ waste water generated during the construction phase should be ensured. Efforts shall be made to workers at the site. Provision should be made for mobile toilets. Open defecation provide mobile STP for treatment of waste water during the construction phase. 3
 - All the topsoil excavated during construction activities shall be stored for use in horticulture/landscape development within the project site. [4]
- construction phase is properly stored within the project area and disposal of project proponent shall ensure that the building material required during neighboring communities and should be disposed of after taking necessary precautions for general safety and health aspects of people, only in approved sites with the approval construction waste should not overte any adverse effect on the of competent authority. The [2] <u>ල</u>
 - any hazardous waste generated during construction phase, should be disposed off as rules and norms with necessary approval of the Haryana State Construction spoils, including bituminous material and other hazardous materials, must not be allowed to contaminate watercourses and the dump sites for such material must be secured so that they should not leach into the ground water and Pollution Control/Board. applicable per

「「「「「「「「「」」」」

- Environment (Protection) Rules The diesel generator sets to be used during construction phase shall be of ultra low to prescribed for air and noise emission standards. conform sulphur diesel type and should Ξ 8
- The diesel required for operating DG sets shall be stored in underground tanks and if required, clearance from Chief Controller of Explosives shall be taken [6]
- Ambient noise levels shall conform to the residential standards both during day and Incremental pollution loads on the ambient air and noise quality should be closely monitored during construction phase. Adequate measures should be taken to reduce ambient air pollution and noise level during construction phase, so as to conform to the stipulated residential standards of CPCB/MoEF. might.
 - Fly ash shall be used as building material in the construction as per the provisions of Fly Ash Notification of September 1999 and as amended on 27th August 2003. [10]
 - Storm water control and its re-use as per CGWB and BIS standards for various applications should be ensured. [12]
 - Water demand during construction shall be reduced by use of pre-mixed concrete, curing agents and other best practices.
 - In view of the severe constrains in water supply augmentation in the region and specifying water extraction quantities and assurance from HUDA/ utility provider sustainability of water resources, the developer will submit the NOC from CGWA indicating source of water supply and quantity of water with details of intended Assurance is required for both construction and operation stages separately. It shall be submitted to the SEIAA and RO, MOEF, Chandigarh before the start of construction. non-potable. of water - potable and use [13]
 - Roof must meet prescriptive requirement as per Energy Conservation Building Code by using appropriate thermal insulation material. $\begin{bmatrix} 14 \end{bmatrix}$
- Conservation Building Code which is proposed to be mandatory for all air conditioned spaces while it is desirable for non-air-conditioned spaces by use of appropriate thermal Opaque wall must meet prescriptive requirement as per Energy insulation material to fulfill requirement. [15]
- The approval of the competent authority shall be obtained for structural safety of the building on account of earthquake, adequacy of fire fighting equipments, etc. as per National Building Code including protection measures from lightening etc. If any forest land is involved in the proposed site, clearance under Forest Conservation Act shall be obtained from the competent Authority. [16]
 - Developer shall reduce the overall footprint of the proposed development. Project Overexploited groundwater and impending severe shortage of water supply in the region requires the developer to redraw the water and energy conservation plan. proponent shall incorporate water efficiency /savings measures as well as water [17]

the and project area, dust screen for every floor above the ground, proper sprinkling reuse/recycling within 3 months and before start of construction to the SEIAA, The Project Proponent as stated in the proposal shall construct total 01 rain water ground water within the project premises. Rain water harvesting pits shall be designed to make provisions for silting chamber and removal of floating matter before entering harvesting pit. by the local Authority/Directorate of fire from time to time. Further the project proponent shall take necessary permission regarding fire safety scheme/NOC from KW of power supply before the start of construction. In no case project will be Detail calculation of power load and ultimate power load of the project shall be start of The Project Proponent shall not raise any construction in the natural land depression / Nailah/water course and shall ensure that the natural flow from the sufficiently above the level of the approach road to the Project. Levels of the other Construction shall be carried out so that density of population does not exceed The Project Proponent shall submit an affidavit with the declaration that ground water will not be used for construction and only treated water should be used for The project proponent shall not cut any existing tree and project landscaping plan during Maintenance budget and persons responsible for maintenance must be provided. equipments as required by Haryana Fire Service Act, 2009 and instructions issued The Project Proponent shall obtain assurance from the DHBVN for supply of 5667 external construction. Provisions shall be made for electrical infrastructure in the project blocks around Incasures norms approved by Director General Town and Country Department Haryana. and air pollution building Care shall also be taken that contaminated water do not enter any RWH pit. submitted to DHBVN under intimation to SEIAA Haryana before the operational solely on generators without any power supply from any areas in the Projects shall also be kept suitably so as to avoid flooding. meter high barricade safety The Project Proponent shall keep the plinth level of the fire project proponent shall provide for adequate stored material to restrict dust should be modified to include those trees in green area. collection/storage tank for recharging the **m** Haryana and RO, MOEF, GOI, Chandigarh. The project proponent shall provide Nallah/water course is not obstructed. competent Authority as required. of covering power utility. construction. The area. and [24] [20][21] [23] [25] [26] [27] 18 [19] [22]

construction.

17

The project proponent shall construct a sedimentation basin in the lower level of the project site to trap pollutant and other wastes during rains. [28]

- The project proponent shall provide proper rasta of proper width and proper strength for the project before the start of construction. [29]
 - The project proponent shall ensure that the U-value of the glass is less than 3.177 and maximum solar heat gain co-efficient is 0.25 for vertical fenestration. [30]
- Project Proponent shall provide respiratory protective equipment to all construction The project proponent shall adequately control construction dusts like silica dust, non-silica dust and wood dust. Such dusts shall not spread outside project premises. workers. [31]
 - civic infrastructure of the drainage system, Solid waste management site and provision for treatment of green belt Storm water bio-degradable waste, STP, water supply line, dual plumbing line, electric supply internal roads, development, sewerage line, Rain Water recharge arrangements, lines etc. and shall offer possession of the units/flats thereafter. complete including develop colony shall Group Housing proponent project Affordable The [32]
- The project proponent shall provide one refuge area till 24 meter, one till 39 meter and one after 15 meter each, as per National Building Code. The project proponent shall not convert any refuse area in the habitable space and it should not be sold out/commercialized. [33]
 - The project proponent shall provide fire control room and fire officer for building above 30 meter as per National Building Code. [34]
- The project proponent shall obtain permission of Mines and Geology Department for excavation of soil before the start of construction. 35]
- The project proponent shall seek specific prior approval from concerned local system including their integration with external services of HUDA/ Local authorities beside Authority/HUDA regarding provision of storm drainage and sewerage other required services before taking up any construction activity [36]
 - The project proponent shall submit the copy of fire safety plan duly approved by Fire Department before the start of construction. [37]
- the public drainage system and shall seek permission of HUDA before the start of The project proponent shall discharge excess of treated waste water/storm water in construction. [38]
- The project proponent shall maintain the distance between STP and water supply line. [39]
- The project proponent shall ensure that the stack height is 6 meter more than the highest tower. [40]
- The project proponent shall ensure that structural stability to withstand earthquake of magnitude 8.5 on Richter scale. [41]

<u>Operational Phase:</u>

- "Consent to Operate" shall be obtained from Haryana State Pollution Control Board under Air and Water Act and a copy shall be submitted to the SEIAA, Haryana. R
- recycled to achieve zero exit discharge. The installation of STP shall be certified The Sewage Treatment Plant (STP) shall be installed for the treatment of the sewage to the prescribed standards including odour and treated effluent will be by an independent expert and a report in this regard shall be submitted to the treatment of waste water is mandatory. The project proponent shall remove not water. Discharge of treated sewage shall conform to the norms and standards of CPCB/ HSPCB, whichever is environmentally better. Project Proponent shall project proponent shall essentially provide STP preferably equivalent to 50% of Tertiary only Ortho-Phosphorus but total Phosphorus to the extent of less than 2mg/liter. Similarly total Nitrogen level shall be less than 2mg/liter in tertiary treated waste implement such STP technology which does not require filter backwash. The SEIAA, Haryana before the project is commissioned for operation. total capacity or as per the initial occupancy as the case may be. **[**]
 - Separation of the grey and black water should be done by the use of dual plumbing ensuring that the re-circulated water should have BOD level less than 5 mg/litre Treatment of 100% grey water by decentralized treatment should be done and the recycled water will be used for flushing, gardening and DG set cooling etc. to achieve zero exit discharge. line.
- For disinfection of the treated wastewater ultra-violet radiation or ozonization process should be used. P
- conform to rules made under the Environment (Protection) Act, 1986. The as promised by the project. proponent with appropriate stack height above the highest roof level of the project Diesel power generating sets proposed as source of back-up power for lifts, common area illumination and for domestic use should be of enclosed type and as per the CPCB norms. The diesel used for DG sets shall be ultra low sulphur diesel (35 ppm sulphur), instead of low sulphur diesel. in the open location of the DG sets shall be [e]
- Ambient Noise level should be controlled to ensure that it does not exceed the prescribed standards both within and at the boundary of the Proposed Group Housing Colony. Ξ
- The project proponent as stated in the proposal should maintain at least 31.49% green cover area for tree plantation especially all around the periphery of the project and on the road sides preferably with local species which can provide protection against noise and suspended particulate matter. The open spaces inside as 20

the project shall be preferably landscaped and covered with vegetation/grass, herbs & shrubs. Only locally available plant species shall be used.

- minimizing grass area, using native variety, xeriscaping and mulching, utilizing The project proponent shall strive to minimize water in irrigation of landscape by evapoafter checking efficient irrigation system, scheduling irrigation only transpiration data. [1]
 - Rain water harvesting for roof run-off and surface run-off, as per plan submitted Before recharging the surface run off, pre- treatment through sedimentation tanks must be done to remove suspended matter, oil and The bore well for rainwater recharging shall be kept at least 5 mts. above the highest ground water table. Care shall be taken that contaminated water do not enter any RWH pit. The project proponent shall avoid Rain Water Harvesting of first 10 minutes of rain fall. Roof top of the building shall be without any toxic material or paint which can contaminate rain water. Wire mess and filters should be used wherever required. should be implemented. grease. The
 - should be monitored regularly in consultation with Central Ground Water Authority. ground water level and its quality ľ
- A report on the energy conservation measures conforming to energy conservation norms finalized by Bureau of Energy Efficiency should be prepared incorporating details about building materials & technology, R & U Factors etc and submitted to the SEIAA, Haryana in three months time. E
- Energy conservation measures like installation of LED only for lighting the areas outside the building and inside the building should be integral part of the project design and should be in place before project commissioning. Use of solar panels must be adapted to the maximum energy conservation. The E
 - depleting potential material in insulation, refrigeration, air-conditioning and adhesive. Project Proponent shall also Project Proponent shall use zero ozone provide Halon free fire suppression system. Ξ
 - The solid waste generated should be properly collected and segregated as per the degradable waste should be treated by appropriate technology (proposed OWC) at the site ear-marked within the project area and dry/inert solid waste should be requirement of the MSW Rules, 2000 and as amended from time to time. The biodisposed off to the approved sites for land filling after recovering recyclable 0
 - The provision of the solar water heating system shall be as per norms specified by HAREDA and shall be made operational in each building block.
- The traffic plan and the parking plan proposed by the Project Proponent should be scope of additional parking for future requirement. There should be no traffic congestion near the entry and exit points adhered to meticulously with further [d]

should be fully proposed project site. Parking internalized and no public space should be used. from the roads adjoining the

- The Project shall be operationalized only when HUDA/local authority will provide domestic water supply system in the area. Ξ
 - the electrical after solid waste management and even ensured shall be pollution control measures STP, Operation and maintenance of completion of project. Infrastructure, S
 - Different type of wastes should be disposed off as per provisions of municipal solid waste, biomedical waste, hazardous waste, e-waste, batteries & plastic rules made Management Rules 2001. The project proponent should maintain a collection center for E-waste and it shall be disposed of to only registered and authorized dismantler /waste shall be disposed of as per existing E-waste Management Rules 2011 and Batteries under Environment Protection Act, 1986. Particularly E-waste and Battery recycler.
 - enshrined in various schedules of rule 3 of Environment Protection Rule 1986 shall be strictly complied Standards for discharge of environmental pollutants as with. E
 - Water supply shall be metered among different users and different utilities. [n]
- The project proponent shall ensure that the of DG sets is more than the highest CPCB latest prescribed limits. Noise and Emission level of DG sets greater than tower and also ensure that the emission standards of noise and air are within the 800 KVA shall be as per CPCB latest standards for high capacity DG sets. Σ
 - All electric supply exceeding 100 amp, 3 phase shall maintain the power factor between 0.98 lag to 1 at the point of connection. M X
- The project proponent shall not use fresh water for HVAC and DG cooling. Air project proponent for cooling, if it is at all needed. The Project Proponent shall also use evaporative cooling technology and double stage cooling system for HVAC in order to reduce water consumption. Further temperature, relative humidity during Value and minimum outside fresh air supply may be resorted for conservation of based HVAC system should be adopted and only treated water shall be used by summer and winter seasons should be kept at optimal level. Variable speed drive, best Co-efficient of Performance (CoP), as well as optimal Integrated Point Load power and water. Coil type cooling DG Sets shall be used for saving cooling water consumption for water cooled DG Sets.
- The project proponent shall ensure that the transformer is constructed with high quality grain oriented, low loss silicon steel and virgin electrolyte grade copper. The project proponent shall obtain manufacturer's certificate also for that. Σ

suppress the dust in addition to the already suggested mitigation measures in the The project proponent shall ensure that exit velocity from the stack should be The project proponent shall provide water sprinkling system in the project area to sufficiently high. Stack shall be designed in such a way that there is no stack down-wash under any meteorological conditions. [**3**3]

Air Environment Chapter of EMP.

- of Air Changes per hour/(ACH) in basement never falls below 15. In case of The project proponent shall ensure proper Air Ventilation and light system in the emergency capacity for increasing ACH to the extent of 30 must be provided by the basements area for comfortable living of human being and shall ensure that number project proponent. [ab]
- as per The project proponent shall ensure drinking/ domestic water supply prescribed standards till treated water supply is made available by HUDA. ac
 - The project proponent shall install solar panel for energy conservation. [ad]

PART-B. GENERAL CONDITIONS:

- EIA/EMP and other documents submitted to the SEIAA for the protection of environment and proposed environmental safeguards are complied with in letter and spirit. In case of contradiction between two or more documents on any point, the most environmentally friendly commitment on the point shall be taken as The Project Proponent shall ensure the commitments made in Form-1, Form-1A, commitment by project proponent.
- (both in hard copies as well as by e-mail) to the northern Regional Office of The project proponent shall also submit six monthly reports on the status of compliance of the stipulated EC conditions including results of monitored data MoEF, HSPCB and SEIAA Haryana.
- STP outlet after stabilization and stack emission shall be monitored monthly. Other environmental parameters and green belt shall be monitored on quarterly conduct environmental audit and shall take corrective measure, if required, without delay. (three) months, the project proponent shall ŝ After every basis.
- revoked if it is found that false information has been given for getting approval of The SEIAA, Haryana reserves the right to add additional safeguard measures subsequently, if found necessary. Environmental Clearance granted will be this project. SEIAA reserves the right to revoke the clearance if conditions stipulated are not implemented to the satisfaction of SEIAA/MoEF. [îV]
 - The Project proponent shall not violate any judicial orders/pronouncements issued by any Court/Tribunal. \geq

- All other statutory clearances such as the approvals for storage of diesel from Chief Civil Aviation Department, Forest 1927, 1900, etc. shall be obtained, as applicable by project proponents from the Conservation Act, 1980 and Wildlife (Protection) Act, 1972, Forest Act, respective authorities prior to construction of the project. Controller of Explosives, Fire Department, PLPA [Mi] [V]
 - The Project proponent should inform the public that the project has been accorded Clearance by the SEIAA and copies of the clearance letter are advertised within 7 days from the date of issue of the clearance letter at least in two local newspapers that are widely circulated in the region and the copy of the same should be forwarded to SEIAA Haryana. A copy of Environment Clearance available with the Haryana State Pollution Control Board & SEIAA. This should be conditions shall also be put on project proponent's web site for public awareness. HARYANA STATE Regional Officer, Gurgaon North Haryana State Pollution Control Board.

Terms and conditions

1.

- The industry has declared that the quantity of effluent shall be 772 KL/Day i.e 0KL/Day for Trade Effluent, 0 KL/Day for Cooling, 772 KL/Day for Domestic and the same should not exceed .
- 2. The above 'Consent to Establish' is valid for 60 months from the date of its issue to be extended for another one year at the discretion of the Board or till the time the unit starts its trial production whichever is earlier. The unit will have to set up the plant and obtain consent during this period.
- 3. The officer/official of the Board shall have the right to access and inspection of the industry in connection with the various processes and the treatment facilities being provided simultaneously with the construction of building/machinery. The effluent should conform the effluent standards as applicable
- 4. That necessary arrangement shall be made by the industry for the control of Air Pollution before commissioning the plant. The emitted pollutants will meet the emission and other standards as laid/will be prescribed by the Board from time to time.
- 5. The applicant will obtain consent under section 25/26 of the Water (Prevention & Control of Pollution) Act, 1974 and under section 21/22 of the Air (Prevention & Control of Pollution) Act,1981 as amended to-date-even before starting trial production
- 6. The above Consent to Establish is further subject to the conditions that the unit complies with all the laws/rules/decisions and competent directions of the Board/Government and its functionaries in all respects before commissioning of the operation and during its actual working strictly.
- 7. No in-process or post-process objectionable emission or the effluent will be allowed, if the scheme furnished by the unit turns out to be defective in any actual experience

- 8. The Electricity Department will give only temporary connection and permanent connection to the unit will be given after verifying the consent granted by the Board, both under Water Act and Air Act.
- 9. Unit will raise the stack height of DG Set/Boiler as per Board's norms.
- 10. Unit will maintain proper logbook of Water meter/sub meter before/after commissioning.
- 11. That in the case of an industry or any other process the activity is located in an area approved and that in case the activity is sited in an residential or institutional or commercial or agricultural area, the necessary permission for siting such industry and process in an residential or institutional or commercial or agricultural area or controlled area under Town and Country Planning laws CLU or Municipal laws has to be obtained from the competent Authority in law permitting this deviation and be submitted in original with the request for consent to operate.
- 12. That there is no discharge directly or indirectly from the unit or the process into any interstate river or Yamuna River or River Ghaggar.
- 13. That the industry or the unit concerned is not sited within any prohibited distances according to the Environmental Laws and Rules, Notification, Orders and Policies of Central Pollution control Board and Haryana State Pollution Control Board.
- 14. That of the unit is discharging its sewage or trade effluent into the public sewer meant to receive trade effluent from industries etc. then the permission of the Competent Authority owing and operating such public sewer giving permission letter to his unit shall be submitted at time of consent to operate.
- 15. That if at any time, there is adverse report from any adjoining neighbor or any other aggrieved party or Municipal Committee or Zila Parishad or any other public body against the unit's pollution; the Consent to Establish so granted shall be revoked.
- 16. That all the financial dues required under the rules and policies of the Board have been deposited in full by the unit for this Consent to Establish.
- 17. In case of change of name from previous Consent to Establish granted, fresh Consent to Establish fee shall be levied.
- 18. Industry should adopt water conservation measures to ensure minimum consumption of water in their Process. Ground water based proposals of new industries should get clearance from Central Ground Water Authority for scientific development of previous resource.
- 19. That the unit will take all other clearances from concerned agencies, whenever required.
- 20. That the unit will not change its process without the prior permission of the Board.
- 21. That the Consent to Establish so granted will be invalid, if the unit falls in Aravali Area or non conforming area.
- 22. That the unit will comply with the Hazardous Waste Management Rules and will also make the non-leachate pit for storage of Hazardous waste and will undertake not to dispose off the same except for pit in their own premises or with the authorized disposal authority.
- 23. That the unit will submit an undertaking that it will comply with all the specific and general conditions as imposed in the above Consent to Establish within 30 days failing which Consent to Establish will be revoked.
- 24. That unit will obtain EIA from MoEF, if required at any stage.
- 25. In case of unit does not comply with the above conditions within the stipulated period, Consent to Establish will be revoked.

26. That unit will obtain consent to operate from the board before the start of product activity.

Specific Conditions

Other Conditions :

1. The unit will obtain consent to operate before the occupation of the project.

2. The unit will install STP along with the main project.

3. The unit will install the project only on the land for which Town and Country Planning Department has given license.

4. The NOC is valid only for such land within this project which is under ownership of project proponent and for which report regarding Aravali area has been issued by DC, Gurgaon.
5. The unit will install adequate acoustic enclosures/chambers on their DG SETS with proper stack height as per prescribed norms to meet the prescribed standards under EP Rules,
6. Unit will apply for CTO/ CTE Extension at least 90 days before expiry date of this CTE
7. Unit will not do any construction work in their project without obtaining valid renewed license from DTCP and CTE extension will be become null and void if unit fails to renew DTCP license.

8. Unit will comply with the guide lines issued by CPCB on Environment Management of construction and Demolition Waste issued after the Construction and Demolition Waste Management Rules, 2016 notified by MOEF.

ENGINEERING & CONSTRUCTION

PURCHASE ORDER

Contract/Order : 4200429531

Revision: 0

Date : 23.01.2020

Revision Date: 23.01.2020

Goods and Services Tax (#GST#), Rajesh Trading Company shall strictly and in a timely manner, adhere to and undertake all acts, omissions and compliances required under the applicable GST laws to ensure that Shapoorji Pallonji And Company Private Limited is able to avail the Input Tax Credit/set off/rebate/refund of the GST (along with cesses and surcharges, if relevant) applicable on the supplies made by the Vendor to the fullest extent possible under law. In this regard, without limiting the generality of the foregoing obligation in any manner whatsoever, Shapoorji Pallonji And Company Private Limited reserves the right to specify, for the supplies envisaged under this Contract by the Vendor, the particular compliances to be undertaken (including aspects like (i) whether Vendor should charge IGST or CGST-plus-SGST; (ii) from where the billing should be undertaken and to which registration of Shapoorji Pallonji And Company Private Limited; (iii) whether the Vendor should be responsible to generate the E-Way Bill; (iv) the format of invoices/credit and debit notes/advance receipt vouchers; (v) maintenance of #Compliance Rating# above a specified threshold etc.) and the relevant timelines for such compliances based on the applicable GST laws.

The Vendor acknowledges that any failure in the foregoing obligations (including undertaking the ones specifically instructed by Shapoorji Pallonji And Company Private Limited, if any) can cause significant losses to Shapoorji Pallonji And Company Private Limited in the form of loss of GST credit, statutory interest liability on such credit loss (under applicable GST laws) and adverse impact on compliance rating and thus, undertakes to carry out this foregoing obligation with sincerity, due diligence and without any delay or demur.

b) The Parties agree that Shapoorji Pallonji And Company Private Limited will reimburse the GST component on supplies received only when the corresponding credit has become available in the electronic credit ledger of the relevant GST registration of Shapoorji Pallonji And Company Private Limited.

c) Without prejudice to any other indemnification obligation under this Contract, the Vendor agrees to, at all times, to hold harmless and indemnify Shapoorji Pallonji And Company Private Limited from and against all claims, liabilities, expenses, proceedings, costs and losses that may be suffered or incurred by Shapoorji Pallonji And Company Private Limited which may arise out of or in connection with any failure by the Vendor to adhere to its obligations under clause (a) above. In this regard, the Vendor also hereby indemnifies Shapoorji Pallonji And Company Private Limited from any costs, claim or liability arising out of any claim or action or omission by any employee or consultant or agent or outsourced staff of the Vendor.

MSME Clause:

It will be vendor's responsibility to confirm if they are classified as MSME under the Micro, Small and Medium Enterprises Development (MSMED) Act, 2006. Vendors to intimate status change if any to SPCPL within 7 days of such a change.

b) Place of Delivery :- The goods shall be delivered / despatched strictly as per the instructions in the purchase order.

c) Delayed Delivery:-The time and date of delivery as stipulated in the order shall be deemed to be the essence of the contract. In case of delay in execution of the order beyond the date of delivery as stipulated in the order or any extension in writing sanctioned by the buyer, the buyer shall at his option either.

 accept delayed deliveries at price reduced by a sum / percentage mentioned in the purchase order or every week of delay or part there of.

ii) Cancel the order in part or in lull and purchase such cancelled quantities from else where on account of and at the risk of the seller without prejudice to his rights under(i) above in respect of goods delivered.

d) Delays due to "force majeure":- In the event of causes of "force majeure" occurring with in the agreed delivery terms, the delivery date may be, extended by the buyer at his option on receipt of application from the seller without imposition of liquidated damages. Only those causes which depend on natural calamities, civil wars, and national strikes which have a duration of more than seven consecutive calendar days are considered as the causes of "force majeure". The seller must advise the buyer, by a registered letter duly certified by the Local Chamber of Commerce or Statutory Authorities, the beginning and the end of the cause/s of delay immediately, but in no case later than 10 'days' from the beginning and end of each cause of "force majeure" as defined above.

e) The goods shall correspond with the description or the samples or the original specification there of in full detail and must be delivered and despatched within the stipulated time, as the case may be, other wise the same shall be liable to be rejected and the seller deemed to have wrongfully neglected to deliver the goods according to the contract. The buyer shall in that event, at his discretion, be entitled to either purchase such goods from other sources on seller's account in which case the, seller shall be liable to pay to the buyer any difference between the price at which such goods have been purchased and the price calculated at the rate setout in this order or to hold the seller liable to pay the buyer damages for non-delivery of goods for such wrongful negligence.

f) Packing:- Goods supplied against this order must be suitably and properly packed, (conforming to special conditions stipulated by the buyer, if any) for sale and/or undamaged transport 'by road or rail.

5. EXAMINATION OF GOODS:- Irrespective of the fact that the goods are delivered to the buyer by the seller at the seller's place or at buyer's said office or are despatched as per buyer's instructions, by rail or by road, the goods shall always be supplied, subject to detailed inspection at the buyer's said office or such other destination as specified in the order for ascertaining whether the goods are in conformity with the contract or not and until then in no event the buyer shall be deemed to have accepted such goods and upon any rejection of goods in question, the seller shall be deemed to have failed to deliver the concerned goods in accordance with the contact.

6. REJECTION / REMOVAL OF REJECTED GOODS AND REPLACEMENT :- Within 15 days from the receipt of the intimation from the buyer of his rejection to accept the goods, the seller shall remove at his own cost the rejected goods from the buyer's office or wherever such goods are lying. The buyer shall not be in any way responsible for or be held liable for any loss or deterioration of the rejected goods whatsoever and such goods shall be entirely at the seller's risk. The seller shall pay to the buyer reasonable storage charges for storing such rejected goods for a period exceeding 15 days as aforesaid.

7. BILLS & INVOICES: All bills / invoices for suppliers made bearing sales tax registration number of the seller, should be marked to the Accountant, Shapoorji Pallonji & Co. Ltd., of the place from where purchase order originates in triplicate, duly endorse with purchase order Reference Number and Date and be invariably accompanied by advice of despatch, detailed packing list and should also be accompanied by an appropriate certificate necessary under the sales-tax legislation. Such bills / invoices will be paid for by the buyer within a number of weeks of receipt there of as mentioned in the purchase order, unless otherwise a different period is agreed and incorporated in the purchase order.

Revision: 0

Revision Date: 23.01.2020

NOTE:- Please follow the billing instructions carefully to enable early settlement of your dues. Disregard of the same may involve delay in such settlement. Kindly ensure to mention. The following information in your bills :- (1) Vendor Code Number (2) Purchase Order, Item Number (3) Material Code if any. This information will be available in the Purchase Order sent to you.

8. WARRANTY :-The seller warrants that all materials and / or workmanship shall be of first class quality and standards and the material supplied under the purchase order shall be suitable for the purpose for which the same is intended to be used. The seller shall guarantee that the material shall be in strict compliance with the specifications and requirements agreed upon and further agrees that all materials / goods shall be repaired or replaced as the case may be at his own expense, in case the same have been found to be defective in respect of materials, workmanship, design of process of manufacturing, within a period of twelve months after the same have been put in use or 20 months from the date of acceptance of the goods by buyer, whichever is earlier.

9. RIGHT OF THE BUYER TO SET OFF:- The buyer shall be entitled to recover from the seller any sum/s due to the buyer on account of any damage/s or otherwise, whether in respect of supplies under this order or under any of their previous purchase orders, by deducting such sums from the amount due by them to the seller in respect of supplies made under this order or any of their prior or subsequent orders.

10. CANCELLATION :- The buyer reserves his right to cancel his purchase order or any part thereof and shall be entitled to rescind the contract wholly or in part in a written notice to the seller if" (i) the seller fails to supply in accordance with the terms of the purchase order, (ii) the seller goes bankrupt or goes into liquidation,(iii) the seller fails to deliver the goods on time and / or replace the rejected goods promptly, (iv) the seller makes general assignment for the benefit of the creditors, (v) Receiver is appointed in respect of property of the Seller. The buyer shall also be entitled to cancel this order without assigning any reason/s or becoming in any way liable in such cancellation, provided that in such event, the buyer shall accept the goods already manufactured in accordance with this order and pay for the same.

11. NON-WAIVER :- Failure of the buyer to insist upon any of the terms or conditions incorporated in this purchase order, or failure or delay to exercise any rights or remedies herein or by law, or failure to properly notify the seller in the event of breach, or the acceptance of, or payment, of any goods hereunder or approval of design, shall not release the seller and shall not be deemed a waiver of any right of the buyer to insist upon the strict performance there of or of any of his or their rights or remedies as to any such goods regardless of when goods are despatched, received or accepted.

12. CONTRACTUAL OBLIGATION :- The product parts covered by this order shall be manufactured by the seller to the buyer's drawings and specifications. These drawings and specifications, are buyer's exclusive use and ownership, which the seller shall have no right to dispute on any grounds whatsoever. If shall be obligatory on the seller's part not to divulge or cause to divulge and process, details of manufacture or caused to be manufactured or enter into any director indirect sales of these products / parts nor solicit or entertain, any enquiries for these products / parts by the seller or through others at any time hereafter. Any enquiries received by the seller for these products / parts howsoever, should be sent to the buyer forthwith. The seller's failure to carryout his obligations here in shall mean breach of contract which shall entitle the buyer at any time to take steps to prevent the seller from continuing the breach and also to claim damages for such breach.

13. NO ASSIGNMENT :- This Purchase Order shall not be assigned to any other agency by the seller without obtaining prior written consent of the buyer.

14. DISPUTES AND JURISDICTION :- All disputes relating to this order or relating to the price of the goods supplied there under or otherwise arising there from between the seller and the buyer shall be subject to and be referred to the Court of competent jurisdiction situated within the limits of Greater Bombay. Neither the seller nor the buyer shall take or adopt any legal proceedings to enforce any claim against the other relating to this order or arising there from in any Court other than the Court.

Please return the accepted PO / WO within 7(Seven) days. Non-Receipt of acceptance / comments will mean that the PO / WO along with the all terms and conditions would be deemed to have been accepted.

No. HSPCB/Consent/: 2816716FDBBCTO2521364

Dated:07/01/2016

M/s :Satyam Petro Chemical P no-05, Sector-04, Faridabad FARIDABAD 2

Subject: Grant of Consent to operate for discharge of effluent under section 25/26 of the Water(Prevention & Control of Pollution) Act, 1974, from 01/04/2016 - 30/09/2020

Please refer to your consent application received on dated **2015-12-24** in Regional Officer, Ballabhgarh on the subject cited above.

With reference to your above application for consent for the discharge of domestic effluent and trade effluent under Water (Prevention & Control of Pollution) Act, 1974 hereinafter referred as the Act M/s **Satyam Petro Chemical** is hereby authorized by the Haryana State Pollution Control Board, to discharge their effluent arising out of their premises in accordance with the terms and conditions as mentioned below:-

- 1. The daily quantity of domestic effluent from the factory shall not exceed 0.5 KLD
- 2. The daily quantity of the industrial effluent (Process, floor & equipment wash, cooling and bleed water) from the factory shall not exceed **0 KLD**
- 3. The industry has been assessed for the purpose of Consent to operate fee with investment cost (land, building, plant and machinery) of Rs. 25.0 Lakh. In case the investment cost varies as per the annual report for the years duly audited by the Chartered Accountant, the difference of Consent to operate fee, if any, arises, the industry shall pay the same amount within one month of the receipt of notice from the Board in this regard.
- 4. The consent to operate shall be valid for the period from 01/04/2016 30/09/2020
- 5. The industry shall ensure that various characteristics of the effluents remain within the tolerance limits as specified in EPA Standard and as amended from time to time and at no time the concentration of any characteristics should exceed these limits for discharge.
- 6. The industry would immediately submit the revised application to the Board in the event of any change in the raw material in process, mode of treatment/discharge of effluent. In case of change of process at any stage during the consent period, the industry shall submit fresh consent application alongwith the consent to operate fee, if found due, which may be on any account and that shall be paid by the industry and the industry would immediately submit the consent application to the Board in the event of any change during the year in the raw material, quantity, quality of the effluent, mode of discharge, treatment facilities etc.
- 7. The officer/official of the Board shall reserve the right to access for the inspection of the industry in connection with the various process and the treatment facilities. The consent to operate is subject to review by the Board at any time.
- 8. The industry shall not discharge any altered quantity/quality of the trade/domestic effluent without prior permission of the Board.

- 9. Permissible limits for any pollutants mentioned in the consent to operate order should not exceed the concentration permitted in the effluent by the Board.
- 10. The industry shall pay the balance fee, in case it is found due from the industry at any time later on.
- In case the industrial unit uses the Municipal/HUDA/Industrial Estate Sewerage system for disposal of effluent for the final disposal they will submit the sewerage connection certificate.
- 12. If the industry fails to adhere to any of the conditions of this consent to operate order, the consent to operate so granted shall automatically lapse.
- 13. The industry will plant minimum three varieties (Eucalyptus, Su Babul or any suitable variety) of trees in the vacant area.
- 14. The consent to operate under Air (Prevention & Control of Pollution) Act, 1981 should be obtained.
- 15. The industry shall obtain Authorization under Hazardous Waste (Management handling and transbonding movement) Rules, 2008 as amended to date.
- 16. The industry shall install separate Energy Meter for ETP and also maintain log book for energy and chemical consumption.
- 17. The industry shall obtain permission from Irrigation Department for discharging effluent into any drain/water bodies.
- 18. If the industry is closed temporarily at its own, they shall inform the Board and obtain permission before restart of the unit.
- 19. The industry shall provide non-leachate storage facilities for storage of Hazardous Waste or dispose off same in the common facilities & will adhere to the norms laid down as per the amended notification under HWTM Rules, 2008
- The industry shall submit A/R once in 3 months in case of 17 categories and other categories. The L&M shall submit A/R once in 6 months.
- 21. The industry shall comply the Public Liability Insurance Rules, 1991, as amended to date.
- 22. The industry shall submit Environmental Audit /Report once in a year.
- 23. The industry shall obtain Environmental Clearance, if applicable as per MOEF Notification.
- 24. The industry shall inform to HO/RO office immediately by FAX in case of failure of ETP.
- 25. In case of bye passing the effluent the consent to operate shall be deemed revoke.
- 26. The industry shall comply all the Directions/ Rules/Instructions issued from time to time by the Board.

Specific Conditions :

Other Conditions :

1. 1. Unit will submit the analysis report under Air Act before 30 April every year.

2. Unit will operate & maintain their APCM efficiently & regularly.

3. Unit will not discharge any trade effluent outside the premises without prior permission of the Board.

electrocuted TRIBUNE NEWS SERVICE

YAMUNANAGAR, JULY 17 Three buffaloes and a calf were electrocuted in Silikalan village of Radaur sub-division in Yamunanagar district on

Tuesday due to heavy rain Anil Kamboi of Silikalan

Anil Kamboj of Silikalan village said that three buf-faloes and a calf were tied in a shed in his cattle yard on Tuesday night. He said that the shed fell down due to heavy rain. He added that when the shed fell down, it broke an electricity wire which killed his animals. Saniu Gundiyana district Sanju Gundiyana, district president of Bhartiya Kisan president of Bhartiya Kisan Union, and Joginder Kam-boj, block president of BKU, visited Silikalan village today and demanded that the government should compen-sate Anil for his loss.

Quality, Health, Safety & Environment Policy

We, at Shapoorji Pallonji, Real Estate Division, believe that our long-term business success depends on our ability to continually improve the quality of services while protecting people and the environment. Hence, we are committed to meet the expectation of our Customers and continuously strive to improve the effectiveness of our Quality, Health, Safety and Environment (QHSE) Management System. To achieve this goal, our impetus will be towards following:

- Provision of safe working environment, prevention of injury, ill health and planning for enhanced emergency preparedness.
- Minimizing adverse impact of our activities on the environment to prevent the pollution and to preserve natural resources.
- > Optimal utilisation of men, machine, finance and other resources.
- > Devising planning system for effective implementation.
- Strong organisational support through human resource development.
- Development of reliable vendors for higher degree of Quality Assurance.
- Communicating openly with stakeholders and making them aware of QHSE aspects.
- Compliance of applicable legal and other requirements.
